DETAILED ACTION

Allowable Subject Matter

1. Claims 10-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Serpedin et al. disclose a method for blind channel identification and equalization of communication channels comprising periodic selection of a symbol from a two-symbol constellation, where the non-conjugated second-order moment sequence would be cyclostationary, and the conjugated second-order moment sequence would be stationary. However, the constellations used by Serpedin et al. are constant modulus, and thus Serpedin et al. do not disclose the claimed limitation of constellations with two symbols having differing amplitudes to provide the second second-order statistic for a first constellation being different from the fourth second-order statistic for a second constellation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David B. Lugo whose telephone number is 571-272-3043. The examiner can normally be reached on M-F; 9:30-6.
